NGUYEN, GEORGE BINH MINH

ART UNIT	PAPER NUMBER
----------	--------------

3723

DATE MAILED: 04/27/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

SP

Art Unit: 3723

1. The reply filed on March 07, 2005 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): upon the election of Group I invention of claims 1-23, 37-39, and 46-59, Applicant failed to further elect the required species as previously presented in the restriction requirement filed January 05, 2005. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

The examiner respectfully suggests below which claims should be reading on which species:

A. Species I, Figures 2A-G and 3, claims 11-16 and 20-21 read on this species because of the specific limitations "processing the lens to obtain full-spatial reference datum indications.

B. Species II, Figures 4A-F, claims 17-23, and 38-39 read on this species because of the specific limitations "blocking the first optical face of the lens".

C. Species III, Figures 5A-B, claims 6 and 47 read on this species because of the specific limitations of "... adapter assembly ..." in claim 6 and "having a radius greater than that of the processed optical faces".

D. Species IV, Figures 6A-H, claims 49-56 read on this species because of the specific limitations "chuck associated with each face of the lens and being in full register with one another" in claim 49.

E. Species V, Figures 7A-D, claims 57-59 read on this species because of the specific limitations of "removing the first chuck and processing the second face of the lens".

The following claims 1-5, 7-10, 37, 46, and 48 do not read on any Species above because the lens is preformed with reference datum indications, the method does not require blocking the first optical face of the lens.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Nguyen whose telephone number is 571-272-4491. The examiner can normally be reached on Monday-Friday/630AM-300PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
